Cindy

Would it be possible if one of your lab chemists would be able to contact the labs below - regarding the info we were looking to analyze for TICS. We called LT Col Grant for the information and the West Virginia lab (Martha) and for various reasons they do not have

Ex. 5 - Deliberative

Wendy can help as well - especially WV Am lab in Huntington who she has been working with on other projects

Thanks

Bill

This was the original request that Wendy and I Sue put together

Please provide VOC and SVOC GC/MS raw data files, including a TIC report processed against the NIST or similar library, which includes the chromatogram and spectra for the 20 largest TICs, for the following samples that were been analyzed using a full scan rather than targeted MCHM scan:

- Approximately 4 of the highest quantitative results for MCHM at locations in the distribution system
- Plant finished water sample showing high quantitative result for MCHM

Please clarify the instrument type, method used (Drinking water versus SW-846 type protocol), and preservative/quench agent.

Wendy,

I am the Science Officer for the 35th CST, LTC Grant wanted me to forward the following POC information to you for the labs used to analyze all the samples. We did not do any of the analyses ourselves so we do not have any of that information. We will help in any way we can to gather the information but thought it would be best for you to contact them directly. If you need any additional information please feel free to contact me.

Thanks.
